# Join the movement. See your impact.

Help entrepreneurs scale globally to create the jobs needed to advance innovation worldwide. In September, the United Nations will vote on the Sustainable Development Goals, an ambitious global suite that seeks to put the world on a more prosperous path by 2030. We are asking thousands of people to support Goal 8, a policy roadmap for countries to provide free and equal work for all through promoting entrepreneurship:

- Increased lending for small businesses globally
- >7% year-over-year GDP growth in developing nations
- More diverse, innovative, technologically advanced economies across the world
- More access to aid-assisted money for startups, entrepreneurs and small businesses
- More global green initiatives
- Equal opportunity employment and equal pay
- Lowered global unemployment
- Elimination of child and slave labor
- Better working conditions for all

Let's work together through policy change to increase access to markets, capital, talent and technology. Entrepreneurs are an essential force for global change – creating jobs, solving problems and scaling big ideas. Now is the time to become advocates and ambassadors for global good.
